

Helmut Januschka

Engineering Leader | Chromium Committer | Software and Systems

Vienna, Austria | helmut@januschka.com | januschka.com | github.com/hjanuschka | linkedin.com/in/hjanuschka

SUMMARY

Engineering leader and hands-on software developer with 25+ years of experience spanning browser engines, low-level C++ and Rust, web platforms, distributed infrastructure, and engineering management. Head of Engineering at Krone Multimedia, CEO and CTO of Captcha.eu, and a Chromium committer. Focused on technical strategy, reliable systems, developer tooling, and changes that move from diagnosis through review, testing, and production.

CORE EXPERTISE

Engineering	C++, Rust, JavaScript/TypeScript, Python, browser engines, image and media codecs
Systems	Linux, Android, Kubernetes, Varnish/CDN, high availability, CI/CD, infrastructure automation
Leadership	Engineering management, technical strategy, system architecture, reliability, cross-team delivery

PROFESSIONAL EXPERIENCE

Head of Engineering - Krone Multimedia GmbH & Co KG Apr 2018 - Present
Austria

Head of IT Operations, Mar 2010 - Apr 2018 | IT Operator, Sep 2004 - Mar 2010 | Apprentice, Mar 2001 - Sep 2004

- Lead engineering management, technical strategy, architecture, and reliability for a digital publishing platform serving millions of users.
- Set technical direction across web and mobile applications, real-time content delivery, Kubernetes, Varnish/CDN, high-availability databases, CI/CD, and broadcast integrations.
- Guide modernization from legacy publishing systems to maintainable digital platforms while keeping production services available.

CEO & CTO - Captcha GmbH / Captcha.eu Apr 2023 - Present
Vienna, Austria

- Lead product and engineering for an accessible, GDPR-oriented bot-protection service hosted in Austria.
- Own architecture, security, integrations, operations, and customer delivery for organizations including OEGB, Bauer Media Group, and E.ON.

Founder & CEO - RunUntil Technologies GmbH Feb 2026 - Present
Vienna, Austria

- Build software products and provide engineering work across browser platforms, systems integration, and developer tooling.

SELECTED OPEN SOURCE ENGINEERING

Chromium Committer - Chromium Project 2024 - Present

- Contribute and review browser code across Blink, media, DevTools, Linux, and Android using C++, Rust, and TypeScript.
- Integrated the memory-safe jxl-rs JPEG XL decoder; follow-up work covers progressive decoding, fuzzing, allocation hardening, deterministic concurrency testing, and parallel decoding.
- Implemented Chrome's --focus tab reuse, lazy loading for video and audio, BFCache focus restoration, and fixes across Wayland, Android PWAs, DevTools, and Web Bluetooth.

Contributor - LLVM, PDFium, WHATWG, and other projects Open Source

- Work includes clang-tidy modernization checks, browser specification and test changes, PDF image-decoder integration, and developer tooling.
